

JOLINE SCHEFFLER SHE/HER

(KSR – SE)

From the depths of Swedish forests, Joline Scheffler builds worlds out of rhythm and shadows. The DJ, live act and sound designer has built her relationship to music continuously throughout her life. Originating from an inner well, it developed through experience and experimentation rather than fixed methods or concepts.

As a live act, Joline immediately extends her studio ideas into performances, presenting primarily unreleased, pure material. Both live and DJ sets inspire movement and form intuitive bonds with the audience and the dancefloor. Invoking a sense of mystery and obscurity, nature is present in the artist's work.

Often described as "Swedish woodland Techno," her music references the expansiveness of Scandinavian nature. A structured rhythmic drive combined with atonal fragments, feedback loops, and heavy reverbs is her signature. Hooks appear inside the structure of the music and almost like spells, she builds atmosphere and depth. With that, Joline operates in the deep and driving corners of Techno and shapes immersive narratives with clarity and strong club focus.

Beyond music and sound design, she has devoted her life to developing the tools themselves, both the hardware and the software behind electronic instruments.

Joline has recently released EPs on italian imprint, KSR. She also appears on EXEKUTE, SK-11 and H.Productions to name a few.
